ASROR ABDUNAZAROV

Frontend Developer

Tashkent, Uzbekistan | +998 (94) 071-11-17 | abdunazarovasror07@gmail.com | github.com/AbdunazarovAsrorbek

Summary

Frontend Developer experienced in building responsive web user interfaces using React, JavaScript, TypeScript, and Tailwind CSS. Practical background in optimizing layouts across devices (mobile and tablet), connecting backend services via RESTful APIs, and managing application state with Redux Toolkit. Collaborative team player proficient with Git and GitHub, ready to contribute effectively to new projects.

Technical Skills

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3
- **Frameworks & Libraries:** React.js, Redux Toolkit, Tailwind CSS, SCSS/Sass
- **Tools:** Git, GitHub, Vite, Postman
- **Core Competencies:** RESTful API Integration (CRUD), Responsive Web Design

Education

- **Tashkent University of Information Technologies (TUIT)** Bachelor of Science in Information Technology (Part-time) | 2023 – 2028
- **IT Park Uzbekistan** Frontend Development Course | 2024 – 2025

Work Experience

Tashkent University of Information Technologies (TUIT) — Tashkent

2025 - 2026

Frontend Developer Intern (Digital Infrastructure Development Center - RIRM)

- Built and styled web interfaces based on designs using JavaScript, React, and SCSS.
- Collaborated with backend developers to integrate RESTful API endpoints for data fetching (GET) and updates (POST, PUT, DELETE).
- Identified and resolved responsiveness issues and UI bugs across various screen sizes.
- Utilized Git and GitHub for version control and collaborative team workflow.

Projects

dreamcode.uz — Personal Portfolio Project

- Designed and built a fully responsive personal website using React, TypeScript, and SCSS.
- Developed interactive UI components for showcasing projects and integrated a functional contact form.
- Configured Vite for fast builds and streamlined local development.

alumni.tuit.uz — Alumni Portal (Team Project)

- Collaborated with the lead developer to build frontend modules using JavaScript, React, and SCSS.
- Implemented user list views, search/filter functionality, and dynamic pagination logic.
- Integrated Redux Toolkit for centralized state management and connected RESTful APIs for server communication.
